1. I was able to meet with Eric Whiting today and learned more about all the responsibilities his team takes on. I am grateful for their hard work. Learning more about how Eric sees the future growth of the city and technology was very insightful and I encourage the council to continue supporting his team's efforts. Current technology already in use and future applications save money, increase efficiency, make our city safer and much more. I was able to go on a 'ride along' with Officer Mohr last Thursday. After speaking with Eric, I am grateful to be able to better see the cohesion of our city departments. Officer Mohr exemplified the integrity our city works hard to uphold. I am grateful for Officer Mohr's and Eric's service to our community. And I am also grateful to see how Eric's team supports Officer Mohr everyday.
2. I would ask the council and Mayor to allow 'new technologies' to be added to the agenda in the coming weeks. I would like to present one specific way we can use free to no cost platforms to be able to offer more opportunities for our citizens to participate in important decisions for our community. During my meeting with Eric today, I showed him a polling application, which I have mentioned before in both public and written comments. I would like to be given the opportunity to show how this application can help our community come together, by giving everyone a voice that wants one.
3. Thank you for all that you do to serve our community.
